

**23-0-0 + 5SO<sub>3</sub> + 5Na<sub>2</sub>O + Selenium (5ppm) + Cobalt (25ppm)**

**SWEETGRASS PLUS** is a new product combining the well-proven benefits of **SWEETGRASS** with the addition of MICRO-MATCH selenium and cobalt.

MICRO-MATCH selenium and cobalt are coated onto 100% of the granules for even distribution and optimum intake by livestock.

**SWEETGRASS PLUS** is a grassland fertiliser specifically designed to:

- increase sward palatability and dry matter intake
- optimise animal health and performance
- maximise milk and meat production from grass
- optimise economic returns

### Why use **SWEETGRASS PLUS**?

- 90% of UK pastures are deficient in selenium and sub-optimal in cobalt
- Palatability is key to optimum grass utilisation
- **SWEETGRASS PLUS** improves palatability
- Improved palatability = increased intake
- Improved palatability = tighter grazing
- Increased intake and tighter grazing = optimum grass utilisation
- Improving palatability is particularly beneficial when grass becomes less digestible or following slurry application which can 'sour' pastures

Nitrogen (N):	Sulphur (S):	Sodium (Na):
✓ Essential for grass growth	✓ Increases N uptake	✓ Improves palatability
✓ Photosynthesis	✓ Increases Dry Matter (DM)	✓ Increases DM intake
✓ Protein production	✓ Protein production	✓ Encourages tighter grazing
Selenium (Se):	Cobalt (Co):	
✓ Increases fertility	✓ Essential for vitamin B <sub>12</sub>	
✓ Increases auto-immunity	✓ Key role in nerves, blood and energy	
✓ Increases liveweight gain	✓ Increases liveweight gain	

**23-0-13 + 5SO<sub>3</sub> + 3Na<sub>2</sub>O + Selenium (5ppm) + Cobalt (25ppm)**  
**22-3-13 + 5SO<sub>3</sub> + 3Na<sub>2</sub>O + Selenium (5ppm) + Cobalt (25ppm)**

**SWEET SILAGE PLUS** is a new product combining the well-proven benefits of **SWEET SILAGE** with the addition of MICRO-MATCH selenium and cobalt.

MICRO-MATCH selenium and cobalt are coated onto 100% of the granules for even distribution and optimum intake by livestock.

**SWEET SILAGE PLUS** is a grass silage fertiliser specifically designed to:

- increase forage palatability and dry matter intake
- optimise animal health and performance
- maximise milk and meat production from forage
- optimise economic returns

### Why use **SWEET SILAGE PLUS**?

- 90% of UK forages are deficient in selenium and sub-optimal in cobalt
- Palatability is key to optimum silage utilisation
- **SWEET SILAGE PLUS** improves palatability
- Improved palatability = increased intake
- Improved palatability = higher silage utilisation
- Sodium increases sugar levels which helps optimise fermentation

Nitrogen (N):	Potassium (K):	Sulphur (S):
✓ Essential for grass growth	✓ Drives yield	✓ Increases N uptake
✓ Photosynthesis	✓ Increases N uptake	✓ Increases Dry Matter (DM)
✓ Protein production	✓ Plant health	✓ Protein production
Sodium (Na):	Selenium (Se):	Cobalt (Co):
✓ Increases DM intake	✓ Increases fertility	✓ Essential for vitamin B <sub>12</sub>
✓ Stable silage fermentation	✓ Increases auto-immunity	✓ Key role in nerves, blood and energy
✓ Buffers rumen pH	✓ Increases liveweight gain	✓ Increases liveweight gain
